

Modifications made since version 7.2 10/14/2003

→ Addition of features concerning the input and display of names:

A new option is now available under the Heredis preferences, which makes it possible to select the display order of names (surname-given names, given names-surname) in the navigation screens and in the lists.

A personalized data entry for surnames and given names is proposed

→ Corrections have been made concerning:

1) the Gedcom import of files created with other genealogy software such as The Master Genealogist and Legacy:

- * The maiden names are correctly imported
- * Import of comments associated with a source

2) the display of dates according to the date format set under the preferences:

- * The edition of the list of anniversaries has been corrected
- * The date displayed in the list heading and further that appearing in column headings are conform to the date format chosen under the preferences
- * Improvement in the calculation of anniversary dates

→ Patch concerning the Heredis help:

The Heredis help has also been updated taking into account all new features and improvements and is available as a separate patch.
